SIX-MONTHLY INDEXES TO SCIENCE ABSTRACTS

Cumulative indexes to Science Abstracts are published twice a year covering the period January-June and July-December. They comprise author and subject indexes and some specialised or 'small' indexes. For Physics Abstracts and Electrical & Electronics Abstracts the Author Index and Subject Index are published as separate volumes. In this case the Small Indexes are included in the Author Index volume.

Author index

This lists in alphabetical order all authors of papers abstracted in the abstracts journal during the six months covered by the index, together with the title of the paper. Where there are co-authors of a paper the title of the paper is given only under the name of the first author. The serial number of the paper in the abstracts journal is in the form 6-12345, ie 1976—abstract no. 12345.

'Small' indexes

These are specialised indexes which allow the user to find quickly particular types of information which might be difficult to find using the subject or author indexes.

Bibliography index

In this index reference is made to articles which contain a significant list of references or bibliography on the subjects listed.

Book index

This gives details of books received and abstracted by the abstracts journal.

Conference index

This index lists conferences for which published proceedings have been received and abstracted. Reference is given to the individual papers and their serial numbers in the abstracts journal.

Corporate author index

This is an index to those items where a corporate organisation rather than an individual person is the agent primarily responsible for the publication. Such publications typically include reports of industrial firms or of government departments or research establishments. This index replaces the previous Report and Patent assignee indexes.

Subject index

The Subject index provides an alphabetical subject key to the articles included in the abstracts journal. Some general guidance on its use is given below:

1. Look in the index for the name of the specific subject in which you are interested. In most cases this name will be a heading in the index and you will find relevant articles listed under it.
2. Occasionally you will be directed from the subject heading chosen to a different heading under which the relevant or additional articles are listed.
3. If you do not find the subject heading you first choose, try a more general heading.
4. Each entry under the heading relates to an article appearing in the abstracts journal and gives the serial number of that article in the journal preceded by the last digit of the current year, eg 6—12345; ie Abstract number 12345 in the abstracts journal for 1976.

Physics Abstracts

Volume 79, part 1 January-June 1976

Author Index

Physics Abstracts is published twice monthly by the Institution of Electrical Engineers. Twice-yearly subject and author indexes covering the period January-June and July-December are included in the subscription. Printed by G. A. Pindar & Son Ltd., Scarborough, N. Yorkshire, England. Second class postage paid at Piscataway, NJ 08854 USA.

Errata

Physics Abstracts

Entry 66281 of 1st October 1975 wrong authors and affiliation are quoted; these should read P.D.Feitsma, G.K.Slagter,;W. van der Lugt (Solid State Physics Lab., Univ. of Groningen, Netherlands).

Entries 73835, 73836, 74197, 74248, 74330 and 74424 of 3rd November 1975 affiliation should be Academia Sinica, China.

Entry 84402 of 16th December 1975 editor should read E.J.Henley.

Entry 11695 of 16th February 1976 page numbers should read 310-12, 319.

Entries 16315, 16884, 16885, 17363, 17429, 17801, 18064, 18065 and 19849 of 1st March 1976 journal date should read 1976.

Entry 28845 of 15th April 1976 correct journal reference should be J. Quant. Spectrosc. & Radiat. Transfer (GB) vol. 16, no. 1, 1976.
